The following is an examiner's statement of reasons for allowance: The prior art of record does not teach nor render obvious the instantly claimed invention. There is no teaching in the art to use the organic manganese source that is instantly claimed. In fact, the prior art teaches away from the specific source of the instant invention. One reference states that doping of the II-VI nanocrystals by manganese was only done with a manganese bonded to a selenium atom. The simpler sources the reference concludes do not work. Those sources are the ones encompassed by the instant invention. Therefore, there is no teaching or suggestion in the art to modify the prior art and use the sources as instantly claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
